OVERVIEW

Lakota Solutions is a Small Business Administration (SBA) 8(a)-certified Alaska Native Corporation that offers comprehensive support for a wide range of government research and high-security complexes. Our dedicated team of skilled technical professionals maintains and operates sophisticated, state-of-the-art equipment, as well as modest, technically straightforward buildings and systems.

With a combination of experienced management and technical staff, Lakota Solutions is well-known for our expertise and success in efficiently supporting government contracts. Our diverse team allows us to provide operations, technical expertise, and administrative support to various government facilities and equipment. We understand the unique responsibilities and requirements associated with supporting specialized clientele and their unique missions.

We prioritize efficiency and innovation. Our technical staff is equipped with the latest technological advancements and utilizes innovative techniques to maximize efficiency. Whether it's heavy workloads or a fast-paced environment, we are prepared to deliver superior workmanship, quality performance, and lasting value on every project - every task.

SPECIALTIES

AGE FLIGHTLINE SUPPORT | Improve reliability and effectiveness of aircraft operations.

Dispatch, service, inspect, clean, corrosion control, modify and maintain powered/non-powered Aerospace Ground Equipment (AGE), munitions materiel handling trailers/components, and equipment other than AGE.

EQUIPMENT REPAIR & MAINTENANCE | Enhance safety, reduce costs, and improve overall asset management.

Support field maintenance, technical assistance, technical inspections, and maintenance services and repairs (both scheduled and unscheduled) in accordance with client-specific technical manuals and standards.

FACILITIES SUPPORT | Expand operations through comprehensive facilities support management.

Perform logistics, warehousing, storage, distribution, vehicle/heavy equipment maintenance and repair, and airfield ground support, as well as maintenance, alteration, repair and construction of real property/facilities.

CONSTRUCTION MANAGEMENT | Safely deliver projects by effectively managing risks, budget, and personnel.

Provide new installation, renovation, and alteration projects including structural repair; engineering and design; mechanical, electrical, and plumbing; HVAC and fire suppression/protection system installation; roofing, flooring, and painting; site work, paving, drainage, and fencing.
